## About Digital Realty

Digital Realty Trust, Inc. supports the data center and colocation strategies of more than 1,000 firms across its secure, network-rich portfolio of data centers located throughout North America, Europe, Asia and Australia.

Digital Realty's clients include domestic and international companies of all sizes, ranging from financial services, cloud and information technology services, to manufacturing, energy, gaming, life sciences and consumer products.

**DIGITAL REALTY**

Digital Realty deploys and manages an internal network within our data centers offering customers a fast and cost effective way to connect your non-contiguous space either in suite or on different floors of the building. With Digital Realty IntraCustomer Connect, your company has the ability to build “home-run” connections, bypassing the Digital Realty Meet Me Areas, simplifying delivery and lowering cost.

Our IntraCustomer Connect products allow you to order fiber pairs in flexible bundles from 3 pairs all the way up to 108 pairs and copper cabling in bundles of either 3 or 6 cables. A simple one-time installation fee and 30 day disconnect window allows your business to adjust on the fly.

By taking advantage of Digital Realty's extensive fiber and copper networks throughout our colo sites, your business is no longer constrained to contiguous cabinets or cage space. So now you can spread your wings with confidence knowing that, as your business grows, Digital Realty is there to help span the gap so you can take flight!

## Benefits

- Reduce Operational Costs
- Better Performance And Reliability
- Low One-Time Installation Fee
- 100% Uptime Guarantee
- Fully Managed Delivery – No Additional Fiber Trough or Cable Trays To Manage
- Backed By The Digital Realty Command Center's 24/7 Monitoring
