

Internet Exchange

Interconnection

Digital Realty Internet Exchange, is a neutral, privately-owned Internet Exchange, providing a high performance Internet peering platform that allows Carriers, Internet Service Providers, Content Providers, Gaming Providers and Enterprises to quickly and easily exchange IP traffic.

Digital Realty Internet Exchange helps your Internet-connected business reduce operational costs, improve network performance, and add another layer of network resilience; all over a single world-class exchange platform. Digital Realty allows participants to establish a presence on the Exchange quickly, easily and at a competitive price. This is an extension of the underlying Digital Realty strength in connecting diverse networks and leverages our strong history of supporting IP exchanges located in Digital Realty facilities.

DRIX Key Features

- 1G, 10G, and 100G ports available – Capacity as you grow
- LAG ports supported – Bonded ports for further capacity flexibility
- 24/7 NOC support – Network engineers available for speedy resolution
- Dual stack IPv4/ IPv6 support – Future-proofs your networking environment
- Route servers – Simple configuration management
- Public VLAN – Access to all peering participants
- Trunking – Industry-standard 802.1Q encapsulation
- Customer portal – Visibility into traffic stats, participant lists, and more
- Rapid, flexible provisioning – Connectivity on your schedule

Our Differentiators

- Unique peers – Peering partners that you won't find on other exchanges
- Member count – More destinations to send more traffic
- Available in high density meet-me-rooms – More options for your connectivity needs

Benefits

- Cost-effective alternative to IP transit – Low, flat monthly fee
- Simplified connectivity – Access to multiple peers over one physical port
- Improved performance – Local connection to your traffic destinations
- Redundant connection to IP transit – Alternate paths for network resiliency
- One-stop solution – Ease of management with your Digital Realty colocation footprint
