SAN FRANCISCO, CALIFORNIA

DIGITAL REALTY

Why 365 Main Street?

Originally built as a military tank assembly plant, Digital Realty’s data center at 365 Main Street has a solid steel and concrete construction, extensive security capabilities, and 8.6 MW of critical IT power load. The building earned an “essential facility” designation thanks to an award-winning friction pendulum system upgrade which isolates the base of the building from its floors, ensuring critical operations are maintained during and after a major seismic event.
