

Global Colocation Portfolio

Connectivity. Coverage. Capacity. Control.

Secure and Scalable Critical IT Infrastructure

Digital Transformation

The digital economy is remaking both private and public enterprises across all industries, transforming how they create and deliver value.

Centers Of Data Exchange

To solve global coverage, capacity and ecosystem connectivity needs requires a pervasive data center platform that integrates the physical and virtual worlds within proximity to centers of data exchange, interconnected to digital ecosystems and tailored to business needs.

Digital Realty's colocation service enables enterprises of all sizes to move privately-owned servers and networking

equipment out of on-premise installations and into a global connected platform of data centers.

By colocating your IT infrastructure with us, you join a digital meeting place connecting you directly to all major public clouds and digital service providers to meet your business needs.

Our team will understand your specific needs and tailor a solution around your requirements – from single cabinets to entire data halls. Our colocation data centers provide you with the flexibility to scale, the robust ecosystem to connect and the experience to make sure your business is safe and secure.

The Digital Realty Advantage

Ensuring the resiliency of your IT deployments.

- 1 Global consistency across a variety of configurations ensures operational reliability and consistency. More than 15 years of 99.999% availability.
- 2 Expert remote hands services for on-demand assistance with hardware tasks
- 3 Local and global interconnection with access to clouds, networks, and local partners
- 4 Stringent security controls with extensive security infrastructure, including CCTV, biometric / card access, local NOC personnel
- 5 Compliance and certifications to support industry and data protection requirements
- 6 Flexible power density configurations to meet application requirements

Secure

Designed to ensure mission-critical data is always secure and available

Connected

Access the ecosystems that power your business through a simple and open platform

Scalable

Future-proof your deployment with significant capacity for your growing requirements

Flexible & Efficient

Manage your IT environment in real time, less time and operation costs on data center management

Space

- Cabinets up to 52U
- Cages starting at 100 sq.ft.
- Private suites that are fully customizable

Power

- Redundant configurations from N+1 to 2N+1
- AC power with protected voltage
- DC power feeds available
- Backup generators to support 100% uptime

Services

- Scheduled and on-demand services available
- Remote hands services at all sites
- 24 x 7 x 365 coverage

Interconnection

A comprehensive set of connection products to meet your hybrid IT strategies:

- ServiceFabric™
- Cross Connect
- Campus Connect
- Metro Connect
- Internet Exchange
- IP Bandwidth

All Sites Feature

- Redundant power and cooling designs
- Advanced physical security features and controls
- Metro/campus connectivity
- Variable power densities and floor loads

Please Note: Network Service Providers are found within the associated Digital Realty metro footprint. ServiceFabric™ and others enable virtual cloud connectivity to AWS, Azure, IBM, Oracle, Google and other providers. Reference applicable CSP connectivity pages to verify physical on-ramp locations. Metro connectivity enables access to cloud connectivity offerings found in neighboring facilities.

About Digital Realty

Digital Realty brings companies and data together by delivering the full spectrum of data center, colocation and interconnection solutions. PlatformDIGITAL®, the company's global data center platform, provides customers with a secure data meeting place and a proven Pervasive Datacenter Architecture (PDx®) solution methodology for powering innovation and efficiently managing Data Gravity challenges. Digital Realty gives its customers access to the connected data communities that matter to them with a global data center footprint of 300+ facilities in 50+ metros across 25+ countries on six continents.
