Optimize Data Exchange

Digital business requires a new data infrastructure architecture, one that localizes data aggregation, staging, analytics, streaming, and management at global points of business presence. This improves performance and data compliance control, necessary to support exploding volume, variability and velocity of data creation, processing and storage to accommodate digital business. The strategy brings the users, networks, systems, and controls to the data, which removes barriers of data gravity and creates centers of data exchange to scale digital business.

ENABLE CENTERS OF DATA EXCHANGE WITH REDAPT’S ANTHOS ACCELERATOR

By deploying Data Hub on PlatformDIGITAL®, enterprises create centers of data exchange to solve global coverage, capacity and connectivity needs. These centers of data exchange are an ideal place to support analytical workflows. HPC, combined with distributed storage and security, leads to real-time processing which results in real-time benefits.

To enable this solution as a turnkey bundle, Digital Realty has integrated Redapt’s Anthos Accelerator as part of the PlatformDIGITAL® Data Hub solution. This unified solution provides best-in-class hybrid cloud infrastructure that supports paired with a seamless global ecosystem with consistent experience, security and resiliency. PlatformDIGITAL® offers proximity to major IaaS and SaaS providers, simplifying and optimizing multicloud workloads.
DATA HUB STARTER KIT AND REDAPT ANTHOS ACCELERATOR

This turnkey bundle includes the necessary components and services to rapidly plan, deploy and scale your Data Hub with Redapt Anthos Accelerator. The pre-configured solution accommodates a typical enterprise deployment of a Data Hub with Redapt Anthos Accelerator to provide a truly consistent hybrid multicloud experience. This is ideal for workloads that require low latency access to on-premises systems, local data processing, or local data storage.

WHY REDAPT AND DIGITAL REALTY

Redapt is a Google Cloud Premier Partner with deep engineering expertise with public and private cloud technologies. The Anthos PODs are architected as a Kubernetes solution focused on availability, scalability, and performance. Redapt’s capabilities with infrastructure integration, logistics, and global deployment make scaling your datacenter as easy as scaling in a public cloud.

As an end-to-end technology solutions provider Redapt brings clarity to a dynamic technical environment. They help clients navigate through challenges to accelerate growth. With expertise spanning from datacenter infrastructure to cloud implementations, Redapt brings their knowledge and industry experience to all practice areas.

Digital Realty provides PlatformDIGITAL®, the single global data center platform to solve global coverage, capacity and connectivity needs by bringing the users, things, networks and clouds to the data to remove data gravity barriers and scale digital business.

Together, Redapt and Digital Realty are the trusted partners for your business needs.
1. Organizations can deploy Redapt Anthos Accelerator within a Digital Realty Data Center for proximity to existing data sets and core applications. This provides a cloud-like experience while meeting data sovereignty, security, and governance requirements.

2. The organization’s data warehouse will benefit from low latency access to the Redapt Anthos Accelerator system; the system can also be used as a means to migrate the data warehouse to an engineered system.

3. Redapt Anthos Accelerator allows customers with legacy applications that require tight coupling between the application and database due to latency or performance reasons.

4. Internet access is controlled and secured by the enterprise using their security standards.

5. Virtual cloud connectivity provides a secure, high-speed and reliable connection between the Digital Realty Data Hub hosting the Redapt Anthos Accelerator deployment and the cloud. Digital Realty offers virtual connections using our Service Exchange platform or physical connections using a cross connect.

6. Utilize Google Cloud Platform™ service via Anthos to support your applications and workloads.

ABOUT DIGITAL REALTY
Digital Realty supports the world’s leading enterprises and service providers by delivering the full spectrum of data center, colocation and interconnection solutions. PlatformDIGITAL®, the company’s global data center platform, provides customers a trusted foundation and proven Pervasive Datacenter Architecture (PDx™) solution methodology for scaling digital business and efficiently managing data gravity challenges. Digital Realty’s global data center footprint gives customers access to the connected communities that matter to them with 290+ facilities in 47 metros across 24 countries on 6 continents.
