

# Colocation Services in Ireland

# Digital Realty's colocation service provides a safe and scalable home for your IT infrastructure.

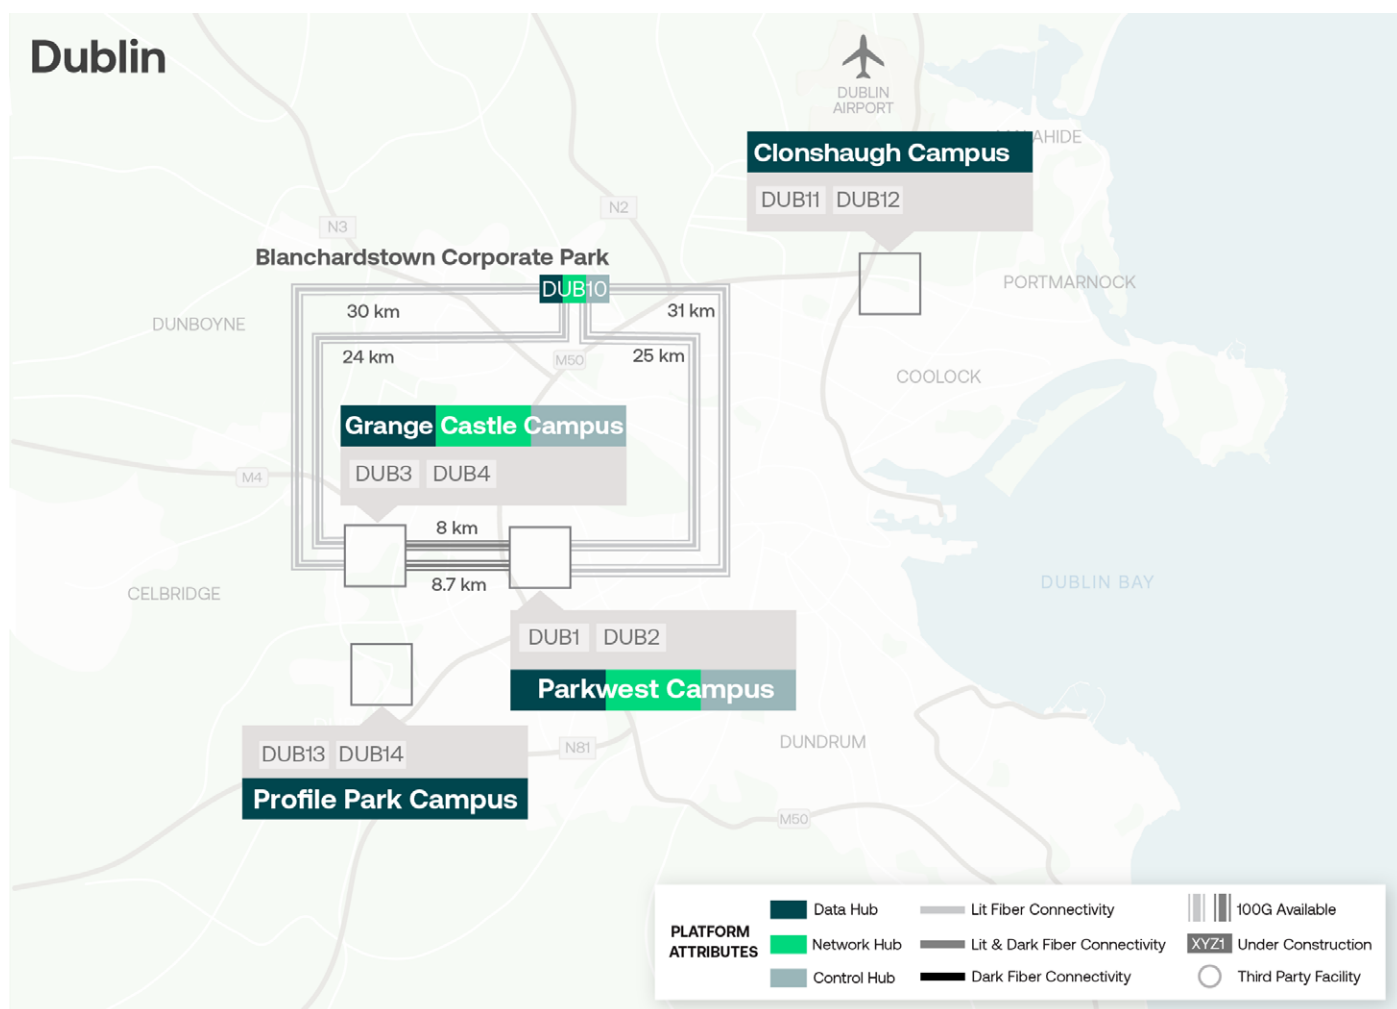

It enables enterprises of all sizes to move privately-owned servers and networking equipment out of on-premise installation and into our facilities.

By colocating your infrastructure in our facilities, enterprises join a connected data community where they can connect directly to internet exchanges, carriers and all major public cloud providers to support hybrid and multi-cloud strategies.

## Solving the Most Complex Hybrid IT Problems for Enterprises Globally

As the largest provider of multi-tenant data center capacity, Digital Realty delivers the full spectrum of data centre, colocation and interconnection solutions to support the world's leading enterprises and service providers – from cloud and information technology services, communications and social networking to financial services, manufacturing, energy, healthcare and consumer products.

## The ideal home for your Hybrid IT

# Providing Solutions to meet your IT needs

**Colocation with Digital Realty provides scalable, sustainable, flexible and cost-effective solutions while allowing customers to remain in full control of their IT infrastructure.**

Here is how we do it.

## PlatformDIGITAL®

Digital Realty offer a global data centre platform to host critical infrastructure and interconnect digital ecosystems, providing the trusted foundation to:

- Solve global coverage, capacity, and ecosystem connectivity needs with a single data center provider
- Tailor infrastructure deployments and controls matched to business needs irrespective of data center size, scale, location, configuration or ecosystem interconnections
- Operate deployments as a seamless extension of any global infrastructure with the consistent experience, security, and resiliency business demands

## At Digital Realty we understand that every business is different

We work with every customer to find solutions to meet their specific IT needs and to ensure that every application and service can be deployed and managed where it makes the most sense.

### Connectivity is the key transformative benefit of colocation
