

Achieve Data Sovereignty and Compliant Cloud Access with Oracle EU Sovereign Cloud and OCI

Seamlessly Integrate Oracle EU Sovereign and Cloud Oracle Cloud Infrastructure through Digital Realty's PlatformDIGITAL®, enabling secure data storage in the EU while meeting regulatory demands.

Oracle's sovereign cloud regions in the European Union allow EU-based organizations to securely host sensitive and regulated data. These regions, located in Germany and Spain, comply with EU regulations and provide the same services as the public cloud. Operations and support are restricted to EU residents and legal entities, ensuring compliance and data protection.

Digital Realty Value Proposition

Key Benefits of Digital Realty's Direct Connection to Oracle:

Performance: By connecting to OCI and Oracle EU Sovereign Cloud from the same data center campus, you minimize latency (just a cross-connect away) – proximity/cloud- adjacent colocation.

Reliability: Achieve predictable, reliable latency, which is needed for many hybrid architectures.

Security: Cross-connects are inherently secure – just a cable in a data center with no active component in-between.

Cost: Moving massive amounts of data is expensive. The costs of WAN and internet usage can be significant for companies that require private connections. For Digital Realty data centers with a dedicated OCI and Oracle EU Sovereign Cloud, the Digital Realty cross connect fee is a factor of 10x lower than the cost of redundant WAN connections.

Ensuring Data Privacy and Sovereignty

Oracle EU Sovereign Cloud prioritizes data privacy and sovereignty for European customers. It offers the same services and support as OCI's public cloud regions, located entirely within the EU to comply with EU regulations.

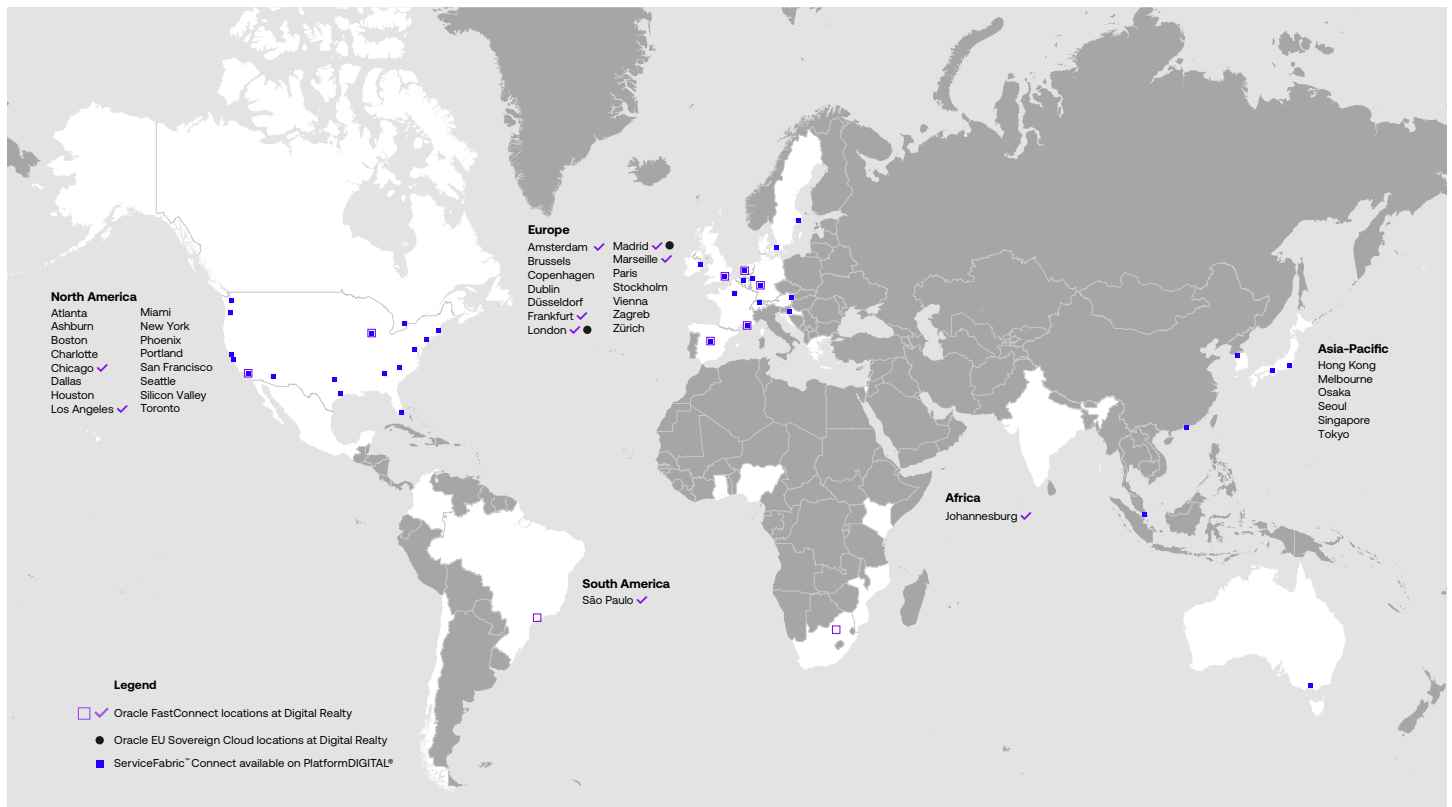

Enabling Hybrid Multi-Cloud IT Architectures

EU customers can connect their EU Sovereign Cloud resources to OCI and other leading cloud platforms for hybrid multi-cloud IT architectures. By using Oracle FastConnect cloud onramps, customers can easily connect and benefit from multi-cloud deployments.

Reliable Connectivity with Global Reach

Digital Realty's ServiceFabric™ enables seamless interconnection between Oracle's EU Sovereign Cloud, OCI, and other leading cloud providers. With over 130 points of presence globally, customers can securely and reliably connect to the Oracle EU Sovereign Cloud from anywhere around the world. This allows for high-bandwidth workloads such as analytics, AI, data warehousing, and streaming.
