

Docklands Campus

Sovereign House Data Centre

Sovereign House is a premium colocation site within our London **Docklands Campus** alongside **Cloud House and Cloud House West**.

Centrally located in the Docklands and within easy access of Canary Wharf and The City, Sovereign House is a major carrier neutral colocation hub offering direct cloud connectivity to **AWS Direct Connect, Oracle Fast Connect** and **IBM Direct Link**.

Sovereign House is an established site with fast and secure connectivity in the heart of one of the world's most important interconnection points - The London Docklands.

- Colocation in Cabinets, Cages and Private Rooms
- Connectivity to 195+ networks, carriers and internet exchanges, including LINX and LONAP
- Access to all public and private cloud providers
- Rapidly installed Cross Connects within and between data centres across London
- AWS Direct Connect, Oracle Fast Connect and IBM Direct Link available
- Convenient central Docklands location - Jubilee line or DLR access

direct cloud options.

London Metro Connectivity

Sovereign House is an interconnected part of the **London Metro** which connects eight of Digital Realty's colocation sites across the London Metropolitan area, enabling reliable connectivity direct to your partners, suppliers and other Digital Realty customers. Connect to the rest of The Docklands data centres, as well as The City and West London, providing secure access to cloud on-ramps and geographically diverse options for back-up and disaster recovery.

Unlock your global IT strategy from London

Our global infrastructure solution, **PlatformDIGITAL®** enables businesses to interconnect global workflows from anywhere in the world, fulfilling their connectivity needs quickly and efficiently. With access to over 700 connectivity providers, key hyperscale public clouds, local cloud providers, network density and interconnection services customers are able to deploy their IT infrastructure in the buildings and locations of their choice. All benefit from 99.999% uptime, implementation and service consistency across the world and the highest level of physical and network security.
