DIGITAL REALTY

Digital Park Sossenheim

Wilhelm-Fay Straße
65936 Frankfurt am Main

The perfect connection for your applications & systems

Digital Park Sossenheim is located within an established data center hub to the northwest of Frankfurt and only 15 km from the Frankfurt Airport. This makes it easy to reach every business hub in EMEA quickly by air. Therefore, the location has proven to be particularly favorable for those companies whose employees do not have their workplace in Frankfurt.

Thanks to the connection to the European fiber optic network, the facilities have an extremely high level of connectivity. Many, mostly long-standing, customers appreciate the data center for its extensive connection to major telecommunications companies, Internet service providers and Internet Exchanges (IXPs).

At a glance

- Over 40,000 m^2 of data center space
- 10+ connectivity providers on site
- High-performance cloud connect platform
- Qualified security and technical staff
- State-of-the-art systems for early fire detection and suppression
- Innovative energy-efficient refrigeration systems with R1234ze refrigerant

"Digital Park Sossenheim offers our customers the best possibilities for smooth data exchange as well as a constantly secure IT infrastructure. With an availability of 99.999 percent, we are the backbone of the digital transformation. We enable our customers to network and do business with the entire world."

Frank Heinzinger, Senior Account Manager
Farmer Enterprise at Digital Realty

Technical Specifications

Data center
- 40,000+ m² data center space
- Maximum floor load capacity: 1,000 kg/m²
- Raised access floor height: 800 mm
- Raised floor to ceiling height: 3 m

Security
- Proximity access card
- 24x7 on-site security
- CCTV-monitored

Connectivity
- 2 separate entry points into the building
- 10+ connectivity providers on site
- CCTV-monitored
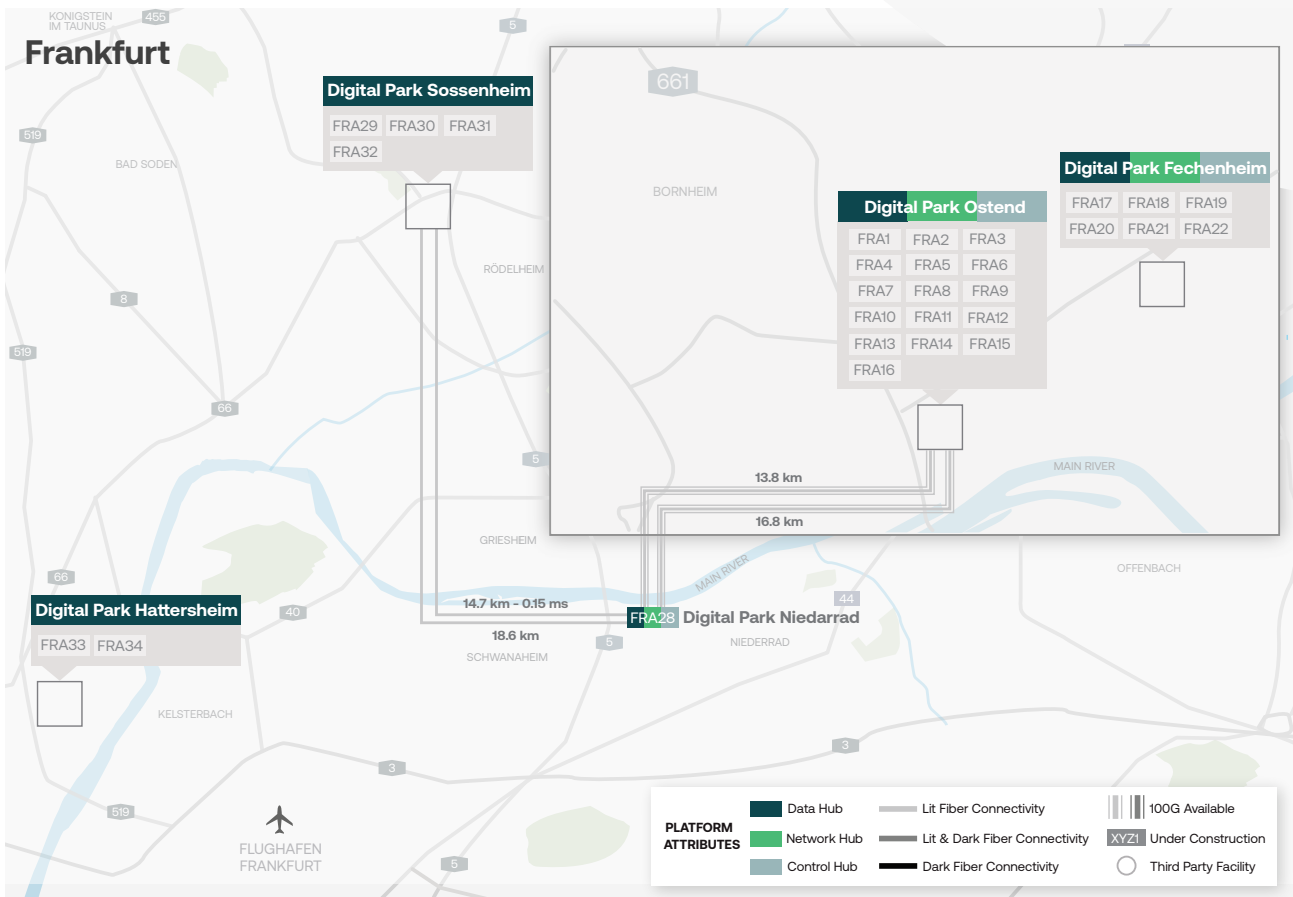

Fire Detection & Suppression
- Multiple detection lines
- VESDA – very early smoke detection system
- Fogtec - high pressure fogging
  (high pressure fire suppression system)

Power
- 2 independent supply feeds into the building
- UPS redundancy: area-dependent N+1 or N+N
- Generator redundancy: N+N or N+1

Cooling
- N+1 cooling redundancy
- Innovative energy-efficient system
