DIGITAL REALTY

MAD3

Madrid's data centre campus offers an ultra-secure, scalable infrastructure with best-in-class connectivity

Spain has a highly developed infrastructure and communications network that benefits from the biggest investment project undertaken in Europe during the last few years. Nearly 40% of private investment in R&D flows into the ICT sector, and the country boasts a very high level of cloud adoption.

Ten minutes from the centre of Madrid, and in the heart of the city's high-tech and connectivity hub known as Silicon Alley, you'll find our network-neutral data centre campus. Customers choose us for our rich connectivity options, our high density power solutions, and our technical and operational excellence. They get the peace of mind that comes from colocating in one of the most secure, reliable and scalable facilities in the area, while retaining complete control over their IT infrastructure.

Innovative companies interconnect at Digital Realty

Increase your competitiveness with the right infrastructure in the right place.

Our Madrid campus attracts a wide range of businesses and provides extraordinary flexibility to meet your growing space and power requirements. MAD3 offers a number of ways to connect with the outside world. This includes direct access to major cloud platforms such as AWS, Azure, Google, Oracle and IBM, a variety of local clouds, and connections to ESpanix and DE-CIX Madrid

At a glance
