

Athens Campus

Located in an industrial area at the outskirts of Athens, the Athens Data Center campus is easily accessible. 10 km from the Athens International Airport and public transportation nearby.

Why Athens?

Athens Data Center Campus is strategically located in Greece; the crossroad of three continents. It is part of SEE and closest to Asia, M. East & Africa. Greece has a geo-economic advantage since it's close to emerging markets representing a population larger than 400 million (Balkans, Central and Eastern Europe, Turkey, Egypt,

Israel or Jordan among others). Greece is also one of the main gateways of submarine networks reaching Europe. Additionally, ultra-high bandwidth telecom networks connect Greece to the rest of Europe and the World by land.

Whether you are serving up Internet content, financial data, or cloud-based services, the facilities in the Athens campus provide an efficient, secure, and resilient location for clients to address their increasing power and space needs while also offering 24x7 flexible & efficient support.

At a glance

- 5,240 m² IT Space
- Uptime Institute Tier III certified
