

AT THE CENTER OF EFFICIENCY

Athens-2 is the first data center in Europe that receives the Leadership in Energy and Environmental Design (LEED) BD+C Gold certification by the US Green Building Council recognising its compliance with the strictest environmental criteria during the design, construction and day-to-day operation.

LAMDA HELLIX' restless efforts to minimise the ecological footprint and reduce energy consumption led to a phenomenal Power Usage Effectiveness (PUE) rate that is almost half the European data centers average.

AT THE CENTER OF CUSTOMER EXPERIENCE

On top of its unique features, Athens-2 comes with a comprehensive portfolio of innovative services that drive new industry standards:

Reliable, agile internet service supported by multiple uplinks to Tier 1 providers.

...
Rigid service-level-agreements that are flexible to adapt to customer needs.

...
360° energy monitoring allows customers to manage the demands of their infrastructure.

...
Exceptional customer service by experienced engineers, eager to provide support beyond the call-of-duty.

AT THE CENTER OF EXCELLENCE

Corporate data are probably the most critical asset of any organization being a constant area of concern. While businesses grow, their priorities change, requiring an advanced environment able to accommodate their current needs and successfully anticipate those emerging.

Athens-2 Data Center by LAMDA HELLIX introduces the new era of the data center industry. A carrier-neutral data center, engineered to excel in extreme performance, energy and reliability requirements and to respond to the expanding demand for availability, user experience and policy compliance.

Athens-2 Data Center employs cutting-edge

technologies, applications and equipment in a fully modular environment that empowers sustainability and cost effectiveness. It is capable to accommodate ultra-high-density racks and within its secure, state-of-the-art

environment, LAMDA HELLIX' customers can enjoy extended connectivity, a unique customer experience and multiple synergy opportunities.

The addition of Athens-2 Business Continuity Area to the existing Data Center campus, boosts the number of concurrent guests that can enjoy a modern, ergonomic and user-adaptive working environment and positions LAMDA HELLIX as one of the top Business Continuity centers in Europe.

AT THE CENTER OF TECHNOLOGY

Designed to world-class standards, Athens-2 incorporates an impressive set of industry leading characteristics:

Guaranteed availability; Tier 3 certified by Uptime Institute.

...
Modularity that ensures efficiency at any size.

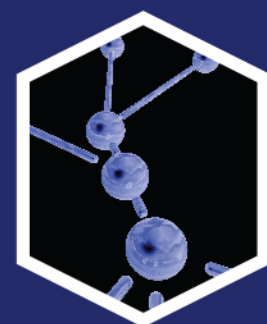

...
Ready to fully accommodate the needs of high and ultra-high density racks.

...
Rigorous physical security systems.

AT THE CENTER OF CONNECTIVITY

Athens-2 provides access to the thriving business ecosystem that already operates in LAMDA HELLIX' Data Center campus.

Cloud and content providers, financial institutions, telecommunication companies, enterprises and government organisations can enjoy significant advantages; such as lower interconnection costs, reduced energy consumption and immediate response to changes.
